

Installation

XP-BLY2518-58 (7 Digit Display)

— **Installation Time:** About 7 minutes

— **Tools Required:** None

1. Unplug the AC power from your pinball machine. Remove game Backglass.
Unplug all display board connecting cables and remove the original glass display circuit boards.
2. JP1: If a comma is desired in your score leave the jumper on JP1, remove if no comma is wanted.
3. JP2: Used for an upcoming feature. Remove and place on a single pin.
4. Assemble the Driver Board and Display Board as shown in the illustration below.
5. Slide the assembly into the tray in the Backboard and plug existing cable assembly into the board.
6. Install Foam Light Blocks around the displays and attach vinyl film if desired.
7. Close it up and install the Backglass. You are now ready to play!
